

Brian Rowan

Keyboard Vocalist

★ *Vast Adaptable Repertoire*

Many years experience playing for all types of parties and events has enabled me to build a truly massive and varied repertoire ranging from the Great American Songbook to the present day, including plenty from the ever popular the 50s, 60s, 70s and 80s. Literally “Cole Porter to Coldplay”. Happy to take requests as well!

With the ability and experience to know how to adapt and adjust the mix of music to suit each audience, whatever the event and mix of guests, I can create the right mood whether for dancing, getting people joining in or just to set the scene.

★ *Real “Live” Musician*

Unlike many performers, who are often limited to karaoke style backing tracks, I play totally live with a top quality professional Roland arranger keyboard which allows for much greater flexibility.

A good quality sound system is always provided and is adaptable for small intimate settings to large scale venues. Modern lighting also available when required.

★ *Experienced Professional*

I have been a professional musician for more than 30 years and played at all types of events and venues from small family parties to top quality hotels, cruise ships, holiday centres and numerous first class venues.

All equipment is regularly inspected for electrical safety (PAT tested) and I have full public liability insurance.
